## Question:

What can be concluded about weather in the state of Virginia in November of 2022?

## Answer supported by Chart:

The weather is composed of cool temperatures with high humidity. The chart shows that over 90 days leading into November there is an unexpected increase in temperature, leading to more moisture being evaporated from the previously cooled atmosphere.

- The **Humidity** chart displays the increase in humidity approaching the end of a 90 day period in mid November
- The **Fahrenheit** Chart displays the sudden increase in temperature within a 2-week period.
