

Setting up an **Action Group** and Notification

The first step in this portion of the project was to create the “VM-Status-Change” action group. Here is that action group listed on the *Manage actions* page.

Home > Monitor | Alerts >

Action groups

+ Create Columns Refresh Open query Delete Enable Disable Test action group (preview)

Search Subscription: all Resource group: all Location: all Status: Enabled

Showing 1 to 1 of 1 Action groups. No grouping

Name	Short name	Resource group	Subscription	Actions	Status
VM-status-change	VM-status	netw211-rg-0152	Azure for Students	1 Email	Enabled
